Comments:

Evaluated by (name/title): __________________________ Date: __________________________
An active farmstead (Inventory No. 96-00572) was identified and recorded. Farmyard visibility varied from <10% to 50% GSV. Field investigation consisted of a pedestrian survey of the surrounding fields, the owners of the farm asked that we not excavate in their yard. Further, we were unable to enter the barn to obtain interior photographs or a frame/truss sketch. Field observation revealed 14 standing structures, most of which are less than 50 years of age. The house (Inventory No. 96-00573), a barn (Inventory No. 96-00574), and a silo (Inventory No. 96-00575) are the only buildings that appear to be 50 years old. None of the structures will be impacted by the proposed bridge replacement. Historic plat maps indicate that the farmstead dates to at least 1886. No artifact collection was made. None of these buildings appear to have the antiquity to be associated with the occupation of the town of Moneek.

The buildings present consist of:
